BOSTON WorldCare International, Inc. (WorldCare), is offering on a pilot basis with select clients, WorldCare ACCESS *Specialty*[®], a new specialty drug second opinion service. Soon the service will be available globally.

WorldCare ACCESS *Specialty*[®] is available through employers, insurers, brokers and third-party administrators as a benefit plan component, as part of an insurance policy or as a stand-alone service. The service provides members and their designated physician(s) with the guidance needed to make optimal healthcare decisions as they move forward.

Through WorldCare ACCESS *Specialty*[®], members and their designated physician(s) are able to rapidly access the expertise of medical and pharmacy experts at the top-ranked U.S. hospitals of the WorldCare Consortium[®]. Members are able to receive a remote, multi-disciplinary evaluation of their underlying medical condition conducted by a sub-specialist at a WorldCare Consortium[®] hospital, followed by an enhanced specialty drug second opinion completed by a PhD pharmacy expert at the Consortium[®] hospital. WorldCare ACCESS *Specialty*[®] enables expert evaluation and on-on-one guidance for choosing the best drug option, along with virtual management of side effects and drug delivery issues. The new service provides alternative choices in both pharmacological-therapeutic and non-drug modalities interventions.

“The increasing complexity and rising costs of specialty drugs present a unique challenge for medical networks and patients. WorldCare ACCESS *Specialty*[®] will benefit members and networks alike by providing an expert sub-specialist analysis of a member’s condition and specialty drug issues,” stated Richard Heinzl, MD, Global Medical Director, WorldCare International, Inc. “This service will not only ensure the most effective drug option as part of a member’s treatment plan, but it will also help reduce wasteful healthcare costs.”
